## SUMMARY

Full-Stack Developer with 4+ years of experience specializing in WordPress, WooCommerce, and API integrations. I've built 40+ websites, developed custom plugins used across 10+ stores, and automated over 2,000 monthly transactions — reducing manual work by up to 90%. Focused on building fast, secure, and scalable solutions for eCommerce and SaaS environments.

Available for remote work and international projects.

## EXPERIENCE

### Senior WordPress Developer

#### EvolvePos

April 2024 - March 2026, Barranquilla, CO

- Developed and maintained 15+ WordPress and WooCommerce websites for the company and its clients. Built 5+ custom plugins to implement features not available in existing solutions and integrated WooCommerce with the company's main software through a custom API.
- Improved website performance by up to 40% by optimizing code, plugins, and server configurations. Implemented security measures and removed malware from multiple compromised WordPress websites, preventing recurring infections.
- Managed 10+ website migrations without downtime, configured Linux servers, and maintained hosting environments to improve stability and performance. Automated technical processes and improved the reliability of company websites through continuous maintenance and performance optimization.

### Full-Stack WordPress Developer

#### Universal Retail Systems

April 2023 - April 2024, Barranquilla, CO

- Redesigned and optimized the company's main website, improving user experience and increasing page load speed by up to 35%. Led the transition from outdated templates to modern, scalable designs, enhancing visual quality and conversion potential.
- Developed and optimized 5+ custom WordPress plugins for client eCommerce platforms, improving functionality and enabling seamless integrations with internal systems.
- Strengthened server and website security by mitigating 2+ cyberattack attempts, removing malware, and implementing preventive measures, reducing recurring vulnerabilities by 80%.

### Full-Stack Web Developer

#### GlobalSoft

February 2022 - March 2023, Barranquilla, CO

- Developed 10+ corporate websites and WooCommerce online stores for company clients. Improved website design, functionality, and user experience across multiple projects.
- Built custom web solutions using WordPress, PHP, JavaScript, and MySQL, including a complete accounting software system with modules for sales, purchases, inventory, and reporting.
- Improved website performance by up to 30% by optimizing code, fixing technical issues, and improving database queries. Collaborated with the development team to deliver high-quality web solutions for different businesses.

### Freelance WordPress & WooCommerce Developer

#### Freelance Projects

February 2022 - Present, Remote

- Developed and maintained **20+ WordPress and WooCommerce websites** for clients across multiple industries.
- Built **custom plugins and themes**, adding functionality not available in standard repositories, improving user experience and client satisfaction.
- Integrated WordPress/WooCommerce with external software via APIs, automating **over 2,000 transactions monthly** and reducing manual work by **90%**.
- Optimized website performance, reducing page load times by **30–50%** and improving SEO rankings.
- Implemented WordPress security measures, including malware removal and hardening, protecting client websites from threats.
- Engineered seamless migration of e-commerce sites to new hosting environments, minimizing downtime and preserving all transactional data integrity.

## PROJECT

### EvolveAPI – WooCommerce & Uber Direct Integration

EvolvePos • Private • April 2024 – March 2026

- Developed a custom API using Python and FastAPI to connect WordPress, WooCommerce, and Uber Direct with the company's main software, automating over 150 daily transactions and reducing manual data entry by 90%.
- Implemented real-time bidirectional synchronization of products/items, ensuring inventory and product data stayed accurate across 10+ stores, reducing stock errors by 95%.
- Streamlined order processing workflows, reducing order fulfillment delays by 50% across client stores.
- Implemented secure REST API endpoints with authentication and encrypted data transmission, protecting sensitive client and payment data.
- Built real-time order synchronization and status updates, increasing order tracking accuracy to 99%.
- Designed the API with scalability, supporting future integrations and handling up to 500 concurrent orders.
- Collaborated with internal teams to ensure smooth deployment and maintainability, reducing internal support tickets by 30%.

### NotiWoo – WooCommerce Order Notification

Freelance Projects • [app.notiwoo.com/](https://app.notiwoo.com/) • February 2024 – March 2026

- Developed a **React + Supabase application** to manage WooCommerce orders, sales statistics, and automated reporting for e-commerce stores.
- Implemented **real-time notifications** for new orders, reducing manual checking by **90%**.
- Automated **order printing**, improving fulfillment speed by **50%** for client stores.

- Designed dashboards and reporting tools, enabling clients to track sales performance and generate reports instantly.
- Integrated secure API connections with WooCommerce, ensuring **accurate data synchronization** across multiple stores.

### Woo-tax-control – WordPress/WooCommerce Custom Plugin

Freelance Projects • [github.com/CarrilloJhonatan/woo-tax-control](https://github.com/CarrilloJhonatan/woo-tax-control) • December 2025 – January 2026

- Developed a **custom WooCommerce plugin** to manage taxes by category and custom classes for 7+ client stores, increasing tax management efficiency by **80%**.
- Designed a **user-friendly admin interface** with tabs for General, Classes, and Categories, simplifying tax configuration for store managers.
- Implemented **custom tax classes and category mapping**, allowing automated application of default, disabled, or custom tax classes per product category.
- Ensured **secure integration with WooCommerce**, including input sanitization, validation, and permission checks, reducing risk of misconfiguration or security issues.
- Added **extensibility features**, including hooks and filters for developers, translation support, and customizable CSS styles, improving plugin adaptability.

### Uber-Direct-Plugin – WooCommerce Delivery Integration Plugin

Freelance Projects • July 2025 – September 2025

- Developed a **custom WordPress/WooCommerce plugin** to integrate WooCommerce stores with **Uber Direct**, automating delivery for **over 100 daily orders** and reducing manual coordination by **90%**.
- Enabled **real-time order dispatch**, speeding up fulfillment time by **40%** across multiple stores.
- Built **secure API connections** to Uber Direct, protecting sensitive order and customer data with **99% reliability**.
- Designed plugin for **easy installation and configuration**, supporting **10+ WooCommerce stores** and multiple WooCommerce versions.
- Implemented **order tracking and status updates**, increasing delivery accuracy and customer satisfaction by **95%**.
- Tested plugin across multiple scenarios and stores, ensuring **scalability for up to 5,000 concurrent orders per day**.

### Dr. José Florez – Plastic Surgery Website

Freelance Projects • [drjoseflorez.co/](http://drjoseflorez.co/) • November 2025 – December 2025

- Developed and maintained a **WordPress website** for a plastic surgery clinic, improving user experience and visual design.
- Implemented **custom plugins and forms** for appointment booking, increasing patient requests by **50%**.
- Optimized website performance and loading speed, achieving **under 2 seconds load time** across devices.
- Ensured website security and uptime by applying **regular updates, malware scanning, and backups**.
- Integrated **SEO best practices**, improving search visibility and attracting **20% more organic traffic**.
- Customized responsive design for mobile and tablet, increasing user engagement and retention.

---
